

AMERICAN EXPRESS OPTBLUE[®] PRICING GUIDE

Includes:

American Express OptBlue[®] Pricing

AMERICAN EXPRESS PREFACE

A significant amount of the fees that we charge to you for processing your Credit Card transactions represents charges charged to us by American Express under American Express rules. This pricing varies based upon a series of pricing levels that may apply to the transaction depending upon several factors – such as the type of card presented, the transaction amount, how and when the transaction is processed, your industry, and other factors.

As a result, a portion of the rate that we charge you will depend on the type of transaction and the pricing level at which the transaction is processed. In order to qualify for a specific pricing level, you must satisfy certain qualification criteria established by American Express. This American Express Program Pricing Guide identifies the primary qualification criteria for the various pricing levels. In reviewing the American Express Program Pricing Guide, please note the following:

- The American Express Program Pricing Guide is only a summary of the primary qualification criteria established by American Express for each pricing level – it is not all inclusive. In the event of any ambiguity or conflict, the requirements established by American Express will determine the pricing level at which your transactions qualify.
- Some pricing levels require that you transmit certain indicators reflecting the nature of your transactions (such as a “swiped or keyed indicator”).
- Pricing levels are based on industry levels that correspond to Merchant Category Codes (“MCC”) groups.
- In addition, pricing levels are based on the transaction amount of the sale transaction. Each industry category has three pricing levels.
- In some cases, transactions may be processed at a more costly pricing level solely as a result of not being swiped or the country of issuance of the card that is presented.
- In some cases, transactions may be processed at a less costly pricing level solely as a result of the type of card that is presented. For example, Prepaid cards.
- The information in the American Express Program Pricing Guide should not be used to develop software or other interfaces for transmitting transactions as technical aspects of these requirements may be much more detailed than the summary presented. If you utilize terminals, software, services or equipment provided or configured by any third party, be aware that failure by these systems to correctly and accurately transmit information in the required formats may result in your transactions not qualifying for the most favorable pricing levels.
